- ▶ Efforts were made to increase revenue collection and phase out fuel subsidies.
- ▶ The government developed programs to support business formalization and projects to simplify procedures in critical sectors.
- ▶ Policy actions are needed to improve the business regulatory environment, specifically in land and labor utilization, and expand social protection programs with better targeting.
- ▶ There is a gap between the legal framework and local land management practices for access to land.
- ▶ Labor regulations remain rigid, and labor institutions are weak and constrain formal employment despite efforts to increase flexibility.
